

## **Creativity powers science.**

**Our Science2Art program utilizes art as an expression of scientific knowledge and creativity, and is a platform for regional scientists to display and describe their research.**

### How the Science2Art Program works:

1. Submit high-resolution artwork by Friday, June 17 at <https://bionexuskc.org/events-calendar/s2a/>
2. Artwork is reviewed and selected by curators.
3. Selected applicants will be notified in early July.
4. Chosen artwork will be:
  - a. Printed on various media
  - b. Featured online and in the 2022 Science2Art video
  - c. Featured in Science2Art exhibit at TBD location in KC

*PLEASE NOTE: By submitting artwork, the researcher is committing to a 1-hr video session in Kansas City on a date TBD.*

5. Auctioned online at BioNexusKC.org and at Annual Event in Fall 2022.

**All proceeds from the auction  
benefit STEAM education  
in our community.**
